

# The Last Pipeful of Sickle Is as Fresh as the First

Real tobacco flavor depends upon the leaf being preserved in its natural state, possible only by pressing the leaves into plug form and keeping it in by covering it with a natural leaf wrapper. The natural flavor and strength of tobacco escape when cut or granulated.

Take a Plug of Sickle that is even thoroughly dried out so that when you whittle it off it crumbles into dust, but it will burn and smoke smooth and cool as it has all of its original tobacco flavor preserved, unevaporated in Plug Form.

Whittling a pipeful is little trouble, amply repaid in both quality and quantity. Try this experiment and judge for yourself.

## Spraying Pumps, Outfits And Insecticides

Spraying is no longer an experiment—when properly done it results in better crops and better fruit. It is not difficult to understand. We give full directions, and when carried out, no damage can result to the

## Myers Spraying Pumps
